

Low-Fidelity Wireframes · 12 Screens · 3 Flows · 3 Failure Paths · 2 Delighters

TS Academy · Phoenix Cohort · Group 39 · Capstone · May 2026

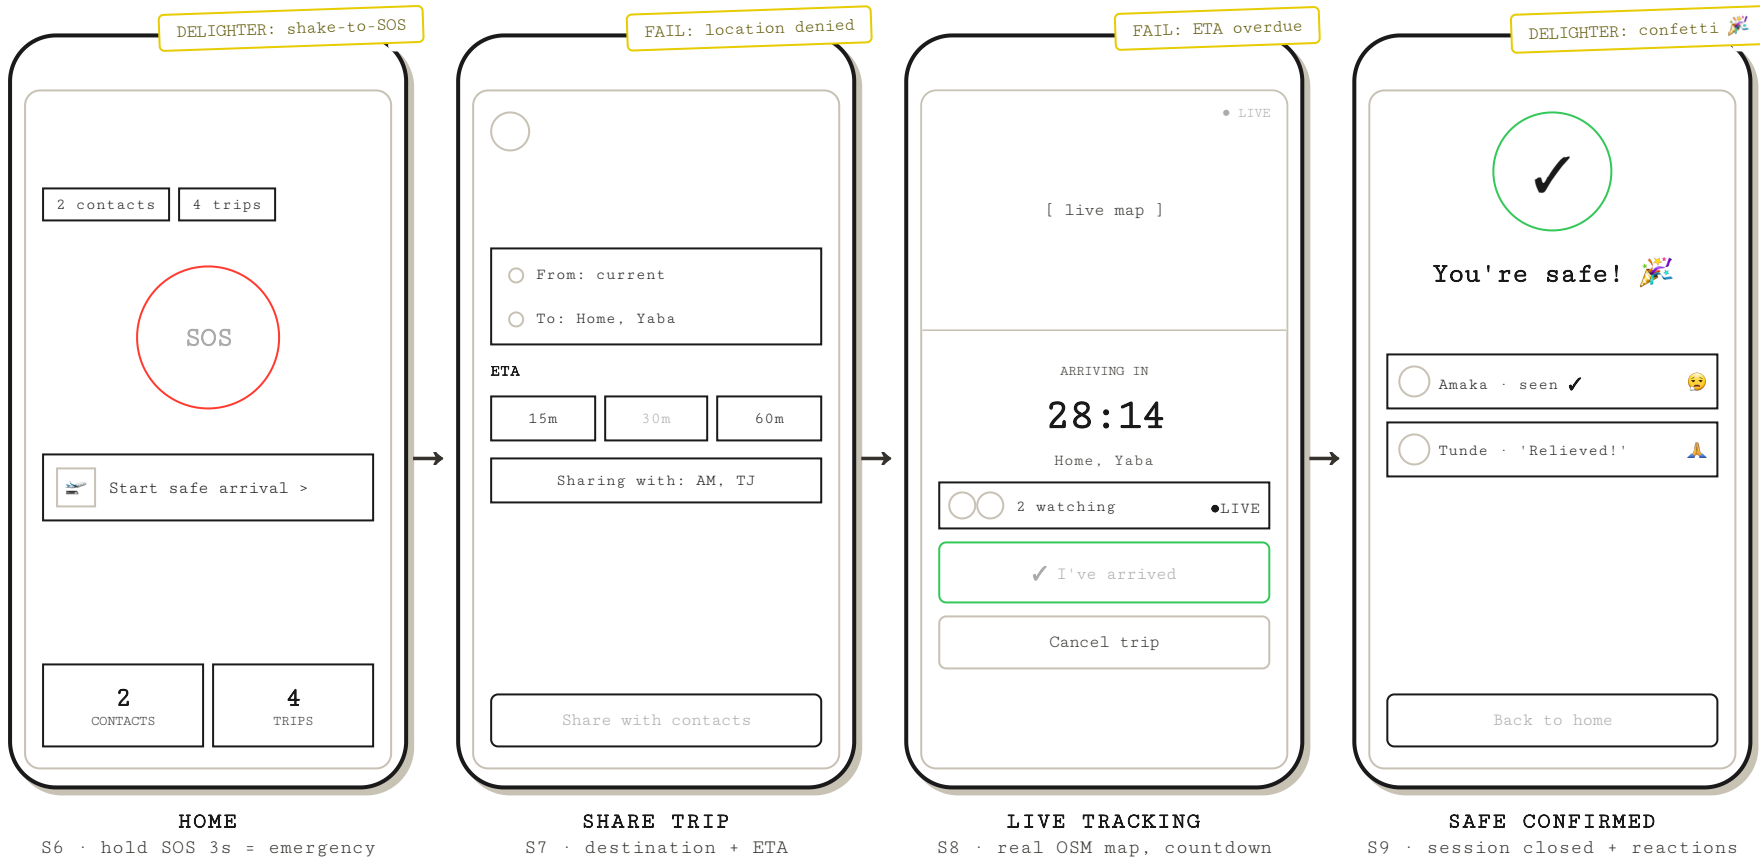

1 Onboarding Flow

Splash → Intro slides → OTP verification → Trusted contacts

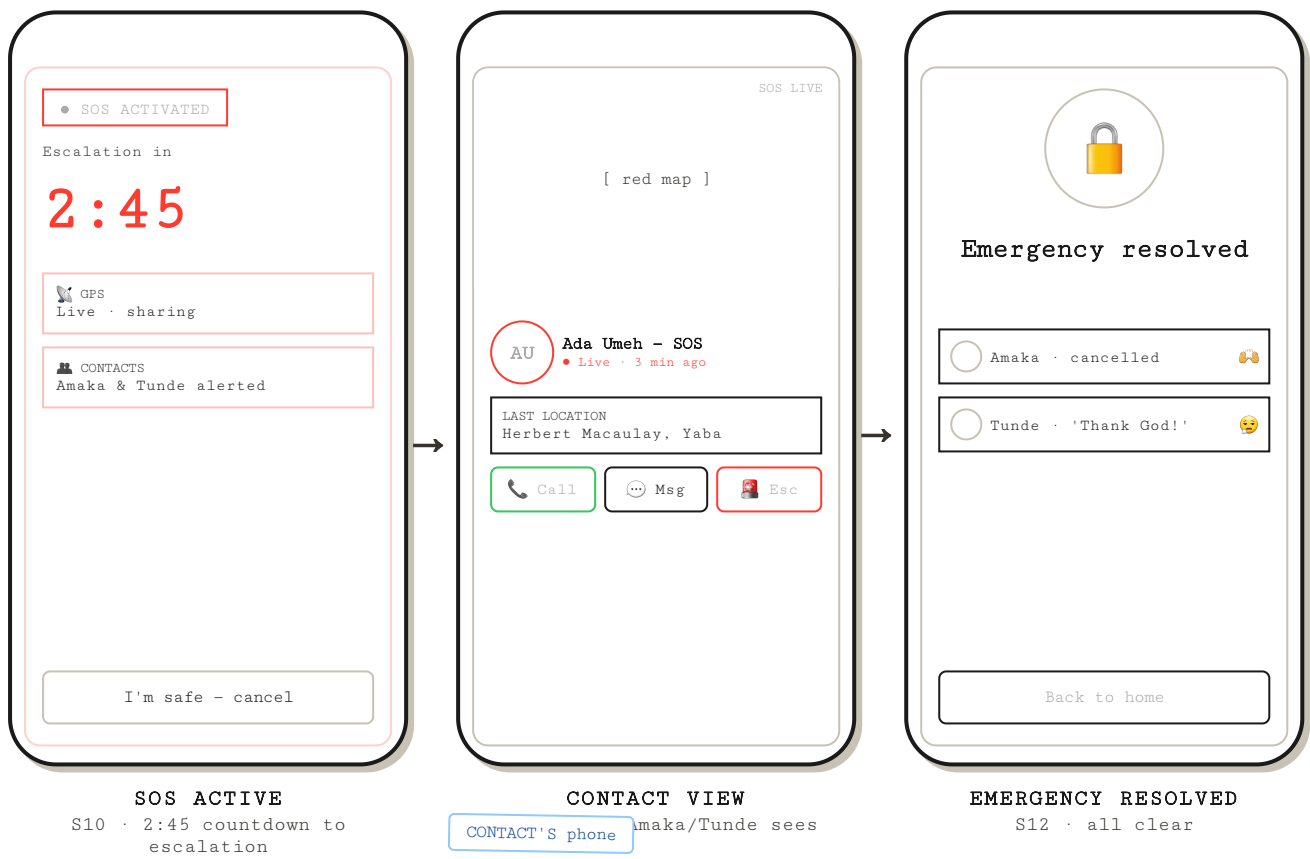

2 Safe Arrival Flow

Home → Share trip → Live tracking → Confirmed safe (with delighter)

3 Emergency / SOS Flow

SOS Hold → Active alert → Contact perspective → Resolved

Legend

! Failure path ★ Delighter 📌 Design annotation | Primary action ✓ Safe state action □ Secondary action

Wireframe principles applied: dark-first design (real app uses navy bg) · sub-60s onboarding · 3-second SOS hold to prevent false alarms · 2:45 escalation gives user time to cancel · contact consent required · prevention-first (safe arrival used more than SOS) · works on Nigerian 3G (single HTML, embedded map library, OSM tiles load progressively).
